

# Simplify your palette

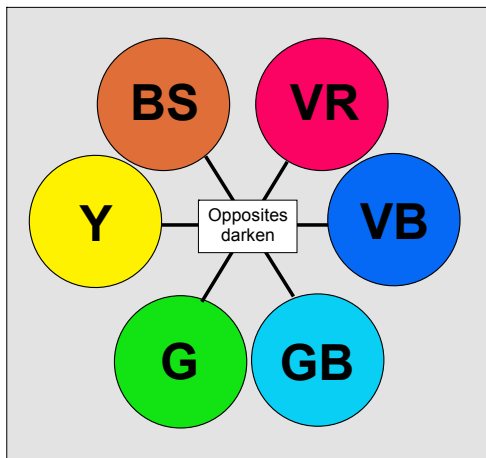

You can create most any spectrum color with a simple six-color palette. And, an infinity of tones and shades you'll make by mixing grays and black with your colors... plus color tints when you add white (the seventh 'color').

Use these **six basic colors** to mix acrylics and oils predictably. Example: G + GB will yield bright pure greens, VR + VB makes pure violets, Y + VR reds and oranges, and Y + BS for a range of yellow-browns, like yellow ochre and raw sienna.

To get natural grays for tones, mix opposites -- like Y + VB, and G + VR. For shades, BS + VB for near-black.

\* **Plus:** Titanium White, for tints and pure white highlights.

-  BS Brown Burnt Sienna
-  VR Violet-Red Quinacridone Red
-  VB Violet-Blue Ultramarine Blue
-  GB Green-Blue Primary Cyan
-  G Green Phthalocyanine Green
-  Y Yellow Primary Yellow

-  +  =  Burnt Sienna plus Ultramarine Blue makes a near Black.
-  +  =  Burnt Sienna plus Primary Cyan makes Burnt Umber.
-  +  =  Burnt Sienna plus Primary Yellow makes Yellow Ochre.
-  +  =  Burnt Sienna plus Primary Yellow makes Terre Verte.
-  +  =  Burnt Sienna plus Quin. Red makes Sinope.
